### Testosterone Boost:

## Notifications Block:

(These will be shown as texts under the results)

## Testosterone Boost Calculation:

1. When **Last Procedure Date** is older than 3 months, then **Testosterone Boost** will be 0.  
And, there will be a notification- "Consider next full procedure round of pellets instead of a boost."
2. When **Symptomatic?:** field is unchecked, **Testosterone Boost** will be 0.  
There will be a notification- "**Boost dosage is zero when patient is not symptomatic**"
3. When **Symptomatic?:** field is checked, **Testosterone Boost** result will depend on **Testosterone Labs (at 5 weeks):**

Testosterone Labs (at 5 weeks):	Testosterone Boost (mg)
0-499	800
500-699	600
700-899	400
900-1199	200
>1200	0 (a notification will show in the notification block - "Boost dosage is zero when testosterone labs are greater than or equal to 1200")
